

Transform your Business by Assessing and Migrating your Applications to Azure

ABOUT the Tidal Migrations platform:

The Tidal Migrations platform and best practices helps you reduce the risk of moving to the cloud. Using data-driven insights, you can assess your application portfolio quickly and effectively including databases and source code. Then, collaborate on a transformative migration to the cloud.

Transform your applications to be cloud-native in less time:

Reduce your risk!

- operational
- financial
- reputational
- business
- compliance
- governance
- competitive

Improve your agility!

By using a business-first, application centric approach, identify your top candidates to transform and leverage cloud-native services like Azure Functions. Assess faster, migrate smarter and strengthen your business.

Get more secure!

Talk to any security department; ask if they are up to date in applying patches to known vulnerabilities! Delegate those non-value adding activities to the Azure team, and focus on security strategy & design.

Save money!

Eliminate the over-provisioning of compute and storage resources and leverage pay per use cloud services Utilize scheduling and transform your applications to operate in the most cost effective manner..

WHAT OUR CUSTOMERS ARE SAYING

"We had budgeted 2 years to lift & shift 30 of our applications. Tidal came in and showed us how we could transform our applications to be cloud-native in the same time frame! This helped us avoid a \$15M hardware refresh and brought our annual operating costs down from \$2.07M to just \$80K."

- Assistant Deputy Minister, Public Sector Company

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
