A CASE STUDY

Highlights

Client: Public Sector Agency
Compelling Event: Hardware Refresh Avoidance
Previous technology stack: AIX, Windows
Previous spend on hosting: $5,200,000 per year
Hardware refresh project: $50 mil avoided

Modernization process:
Replatform COTS applications from traditional IT mode-1 to an immutable infrastructure model.

Replace AIX with Linux, and use Terraform to standup environments with ease.

Results

8 Apps Analyzed

- Refactored: 0
- Replatformed: 5
- Rehosted: 3
- Repurchased: 0
- Retired: 0

OpEx to: $250,000 p.a.
